

## **Guidelines on Outlet Works for Dams (New Practice Notes)**

These guidelines are being prepared in 10 separate Practice Notes, which will be issued as a series of separate documents making up the Guidelines. The Working Group has prioritised the order in which to prepare the Practice Notes. During the past year the Working Group has progress the following notices to draft versions for review:

- Practice Notes 1. General Functions of Outlet Works (Lead: Marius Jonker)
- Practice Notes 2. Configuration and Purpose of Outlet Works Components (Lead: Marius Jonker)
- Practice Notes 9. Rehabilitation, Modernization and Upgrade (Lead: Frank Nitzsche)

The draft versions of the following are in progress:

- Practice Notes 8. Operation and Maintenance (Lead: Brian Simmons)
- Practice Notes 10. Risks and Outlet Works (Lead: David Law)

Once the above are completed, the Group will complete the remaining Notes:

- Practice Notes 3. Design Considerations
- Practice Notes 4. Considerations for Civil Structures
- Practice Notes 5. Considerations for Mechanical Elements
- Practice Notes 6. Considerations for Electrical Elements and Control Systems
- Practice Notes 7. Procurement, Construction, Installation and Commissioning
