

Guidelines on the Design Construction, Operations & Maintenance of Retarding Basins (New Guideline)

The Working Group completed drafting by the ANCOLD Conference in 2016 and Phil Cummins was approached by the Executive to undertake a review of the Draft which was completed by the end of July 2017.

An international reviewer (from the UK) has been approached. It is hoped that we can interest a reviewer from the USA/Canada. The TRP has yet to be formed.

The Working Group is planning to have the Phil Cummins reviewed DRAFT Guideline out for ANCOLD Membership comment at the ANCOLD Conference in Hobart and for International Review and comment by the end of 2017.

The budget has seen NIL expenditure.
